INTRODUCTION:

Cochin Shipyard Limited (CSL), a leading Mini Ratna Public Sector Enterprise in Cochin proposes to engage a firm/agency for creating three numbers of Virtual Reality walk through Videos for CSL.

CSL, a premier shipbuilding and ship repair company in India, is at the forefront of maritime innovation and excellence. With state-of-the-art infrastructure and advanced engineering capabilities, CSL undertakes a diverse range of projects, including the construction of specialized vessels, offshore platforms, and defense ships, as well as ship repair and maintenance. To enhance its digital presence and provide an immersive experience to stakeholders, CSL is embarking on the creation of high-quality Virtual Reality (VR) walkthrough videos that effectively showcase its facilities, capabilities, and projects.

Through this tender, CSL invites reputed and experienced agencies with expertise in VR content development to submit their bids for creating virtual reality walkthrough videos. The project aims to leverage cutting-edge VR technology to offer an interactive and visually engaging representation of CSL's infrastructure, operations, and projects. This initiative aligns with CSL's commitment to adopting innovative communication tools to engage clients, stakeholders, and visitors effectively.

- The scope of work shall be, but not limited to, the following:
 - a. Develop comprehensive 360 degree Virtual Reality (VR) walkthrough videos for CSL.
 - b. Highlight key facilities, infrastructure, and operational areas, including shipbuilding and repair zones.
 - c. Create immersive 360 degree VR walkthrough video of ships constructed by CSL, CSL Yard tour and any other requirement of CSL.

SEC/PR/VR/2025/01

- d. Focus on showcasing the design, craftsmanship, technical features, and engineering excellence of the vessels.
- e. Ensure the videos are fully compatible with VR headsets for an immersive experience and should have facility to do it in an interactive way.
- f. Optimize the videos for seamless playback on mobile devices, laptops, and TV screens with touchscreen functionality, ensuring accessibility without VR headsets also.
- g. Deliver high-quality visuals and interactive elements that provide a realistic and engaging user experience.
- h. Include user-friendly navigation and features for exploring the virtual environment.
- i. Incorporate CSL branding and relevant design elements throughout the videos.
- j. Include captions, annotations, or voiceovers to highlight specific features and achievements.
- k. Perform thorough testing to ensure compatibility and performance across all specified platforms.
- l. Deliver the final outputs in suitable formats for each platform, along with necessary software or instructions for installation and playback.
- m. Provide post-delivery support for any required adjustments or technical issues.
- n. Ensure the videos remain functional and relevant for their intended purposes.
- o. Provide suitable script if required.
- p. The bidder shall ensure the seamless integration of aerial-level 360° images and ground-level 360° images, maintaining smooth transitions for an uninterrupted virtual tour experience. All images must be properly categorised based on perspective and organised systematically to enhance usability. Each image shall be assigned clear, descriptive titles and relevant metadata to facilitate easy identification and navigation. The integration process must adhere to industry standards for accuracy, consistency, and functionality, with the final output thoroughly validated before submission. Any failure to meet these requirements shall be rectified at the bidder's expense, and repeated non-compliance may result in penalties, disqualification, or contract termination.

SEC/PR/VR/2025/01

- q. The bidder shall ensure that the virtual tour includes a screen capture feature, allowing users to take snapshots of any view within the tour. The captured images must be automatically saved to the user's device downloads folder in a standard image format without requiring third-party tools. The feature must function seamlessly across supported devices and browsers, maintaining the original resolution and visual clarity.
- r. The bidder shall implement a Day/Night transition feature within the virtual tour, enabling users to seamlessly switch between day and night views where necessary. This functionality shall be provided as a toggle button integrated within the virtual tour interface, ensuring a smooth transition without requiring a separate link or external redirection. The transition must maintain visual consistency, accurate lighting effects, and perspective alignment to enhance user experience. The bidder shall ensure that the feature is optimised for performance, compatibility, and responsiveness across supported devices and browsers. All necessary details, specific areas, and implementation requirements for the Day/Night transition shall be informed by the company in advance, and the bidder shall incorporate them accordingly. Any additional modifications beyond the agreed scope may be subject to separate discussions and cost considerations.
- s. The bidder shall ensure that all ground-level 360° images used in the virtual tour are captured and processed at a minimum resolution of 12K to maintain exceptional clarity and detail. Additionally, all drone-captured 360° images shall be provided at a minimum resolution of 4K to ensure high-quality aerial visuals. The images must be free from distortions, horizon errors or pixelation that may degrade the viewing experience. The bidder shall adhere to industry best practices for resolution consistency, file optimisation, and seamless viewing experience across devices.
- t. The bidder shall provide offline-compatible files for the 360° Virtual Tour, ensuring full functionality across multiple platforms, including PC, MAC, iOS, and Android. These offline files must allow seamless navigation and interactivity without requiring an internet connection. The bidder shall ensure that the

SEC/PR/VR/2025/01

provided files are optimised for performance, compatibility, and ease of access on the respective operating systems.

- u. The bidder shall ensure that the virtual tour is designed with a modular structure, allowing for the possibility of shooting and replacing individual rooms or specific areas in the future, if required, without necessitating a complete re-shoot of the entire space. While there is no certainty of future revisions, the system must be built to support such modifications efficiently, ensuring seamless integration of new images while maintaining consistency in lighting, perspective, and navigation flow. This requirement pertains only to the capability of making such updates and does not imply any obligation for the bidder to perform future replacements under this contract.
- v. The bidder's virtual tour team must have the in-house capability to integrate 3D or CGI elements into the virtual tour images for specific areas, as required by the company. This provision should ensure seamless incorporation based on the input and project requirements provided. Before bidding, the bidder must showcase reference links of previous work demonstrating their expertise in 3D/CGI integration. These references will serve to set clear expectations regarding the quality, feasibility, and scope of work that can be delivered. The cost implications for 3D/CGI work must be discussed and agreed upon in advance, and no additional claims shall be entertained post-award unless explicitly agreed in writing. Non-compliance with these requirements may result in disqualification or rejection of the bid.
- w. The sample videos required by CSL is as given below for the quality required. (for reference)
